1. 

**Estimating Soil Hydraulic Parameters In El-Tina Plain Using RETC Program**

*M.E. Galal*

Soils Dept., Faculty of Agriculture, Ain Shams University

2. 

**Study Evaluation Of Groundwater Resources In Wadi Yalamlam and Wadi Adam Basins, Makkah Al-Mukarramah,Al-Mukarramah Area**

*Ali M. Subyani*

Hydrogeology Department, Faculty of Earth Sciences, King Abdulaziz University

3. 

**Relationship between Excessive Pressure Drawdown and Groundwater Quality**

*Musaed N. J. Al-Awad*

Petroleum Engineering Department, College of Engineering, King Saud University

4. 

**Development of Hydrological Model for Effective Flood Control**

*Adel R. Awad*

Dept. of Environmental Eng. Faculty of Civil Eng., Tishreen University, Lattakia

5. 

**Investigation of Optimal use of Canal Water in Pakistan**
Abdul Razzaq Ghumman¹, Muhammad Ashraf Khalid Tarrar², Ashfaq Ahmed Tahir³

1. Dean, Faculty of Civil & Environmental Engineering, UET, Taxila, Pakistan
2. Research Scholar UET, Taxila, Pakistan
3. CED, UET, Taxila, Pakistan

6.

Using Under Ground Brackish Water in Cultivation of Saline Sandy Land Under Dried Condition of South Sinai Governorate

M. M. Selim
Field Crop Research Department, National Research Centre, Egypt

7. Reverse Osmosis As A Solution For Water Shortage In Iran

S. S. Madaeni¹ and M. Ghanei²
1. Chemical Engineering Dept., Razi University, Kermanshah
2. Urban & Industrial Water Technology of Iran Co.

8. Silica Removal During Lime Softening in Water Treatment Plant

Ibrahim S. Al-Mutaz\textsuperscript{1} and Ibrahim Ali Al-Anezi\textsuperscript{2}

1. Chemical Eng. Dept., College of Engineering, King Saud University
2. Riyadh Water Treatment Project, Saudi Ministry of Water and Electricity

9. Water Harvesting with Special reference to Egyptian Experience

Shalaan Nasr Shalaan
10. Overview Of Hybrid Desalination Systems - Current Status And Future Prospects

Osman A. Hamed
Research & Development Center, Saline Water Conversion Corporation, Saudi Arabia

11. Boifouling Potential In Open Sea And Adjacent Beach Well Intake Systems

Mohamed O. Saeed, G. F.
Al-Otaibi, Ghazi Ozair and A. T. Jamaluddin

Research & Development Center, Saline Water Conversion Corporation, Saudi Arabia

12.

Do we Adequately Understand the Potential Value of our Regional Aquifers?

J.W.Lloyd

Hydrogeology Research Group, School of Geography, Earth & Environmental Sciences, University of Birmingham

13.
Integrated Water Resources Management; The System of Systems for Sustainable Development: The Egyptian Experience

Mona El-Kady and Fouad El-Shibini

Water Research Center, Ministry of Water Resources and Irrigation, Egypt

14.

Integrated Water Resources Management In The Murray Darling Basin, Australia

M.E. Qureshi, M. Kirby, and M. Mainuddin

CSIRO Land and Water, Acton ACT 2601

15.
The Use of Clay Deposits in Drip Irrigation System for Water Conservation

A.M. Al-Omran¹, A.S. Sheta¹, A.M. Falatah

¹, and A.R. Al-Harbi

²

¹. Soil Science Dept., College of Agriculture, King Saud University
². Plant Production Dept., College of Agriculture, King Saud University

Characteristics of natural clay deposits in Saudi Arabia and their
potential for water conservations

A.S. Sheta¹, A.M. Al-Omran¹, A.M. Falatah¹,
A. As. Sallam¹, and A.R. Al-Harbi²

1. Soil Science Dept., College of Agriculture, King Saud University
2. Plant Production Dept., College of Agriculture,
A Contribution to the development of certain treatment processes of waste water And its re-use in the irrigation for small communities

Y. Benjelloun¹, M. Kadri Hassani1 and A.
Use Of Treated Domestic Sewage Effluent For Growing Summer Oil Crops
In Arid Lands

H.F. Hussein, M.S.M. Saber. S.M.A. Radwan and M. Abu-Seda
National Research Center, Dokki, Egypt

19.

Use of Sea Water for Wheat Irrigation II. Effect on Soil Chemical Properties, Actual
Evapotranspiration and Water Use Efficiency

M.A. Mostafa¹, M.O. Elsharawy

1, and F.M. Elboraei

1. Soil Dept. Faculty of Agriculture, Ain Shams University

2. Desert Research Center, Mataria, Egypt
